

TECHNOLOGY SECTOR REPORTS

EXPERT INSIGHT INTO EVOLVING TECHNOLOGY

NSS Labs' Technology Sector Reports (TSR) combine a year's worth of research and testing into a single, comprehensive report. TSRs provide critical insight into technology issues, market drivers, and key product functionality requirements as specified by technology buyers and industry experts. Technology Sector Reports include:

- Trends in security and compliance faced by information security professionals
- Summary of technology advances in the industry
- Key product features & approaches
- Vendor references and discussion

These reports are invaluable references for information security professionals in all segments of the market, and are widely distributed on the NSS Labs and partner web sites. There is no cost to provide information or appear in the report. All editorial content is independent and free from sponsor influence.

Technology Sector Reports extend the visibility of your NSS Labs product certifications and highlight key features and advantages.

Get Included.

VENDOR BENEFITS

- Gain additional visibility and promotional leverage
- Opportunity to have key functionality highlighted
- Certified products to be included at no additional cost
- Don't be left out of the industry's most comprehensive empirical guide

TECHNOLOGY SECTOR REPORT SCHEDULES

The TSRs will be launched in order to maximize PR and marketing for participating vendors. Deadlines for inclusion in the reports will be set accordingly.

Sector	Publishing Date
• Network IPS	Q2 2008
• Network Firewalls	Q2 2008
• Unified Threat Management (UTM)	Q2 2008
